

Solis

MASTER5000

Ultra-modern design – comfortable operating features

SOLIS MASTER 5000 – the easy and successful preparation of delightful espresso, café crème or cappuccino!

The magnificent design is a perfect fit for all modern surroundings and the ergonomical arrangement of the various functional parts has many practical advantages.

Quality in every detail

For one cup – press once for two cups – press twice

The clearly arranged control panel ensures very easy operation and includes all control indicators: operating temperature, empty bean container, empty water container as well as indicators for brewing unit, drip tray and waste container.

The water reservoir is accessible from above and contains 1,8 l fresh water.

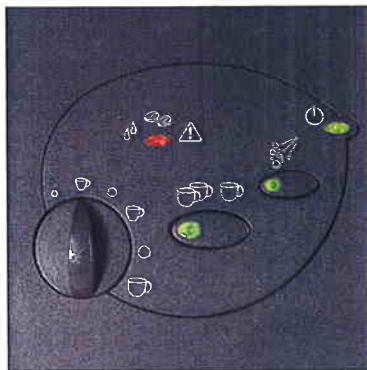

Quietly operating grinder with electronic stone sensor.

The coffee is automatically and freshly ground in the coarseness of your choice. The bean container holds 300 g beans.

Height adjustable dispensing head – ideal for large cups or the preparation of coffee in a glass.

Cup storage area with cover for several espresso or coffee cups

Selection of water volume depending on the size of the cup or the desired strength of the coffee

Pre-brewing system for best flavour extraction

The freshly ground coffee is pre-wet a few seconds prior to the start of the brewing cycle and this ensures perfect aroma extraction.

Swivel steam and hot water nozzle

The special steam nozzle (separate accessory) ensures perfect frothing of the milk.

Drip tray with fill-level indicator

Helps to keep the area around your espresso maker clean.

Large waste container

Easily accessible from the side.

The brewing unit

is accessible from the front and easily removable for cleaning

Available in white or anthracite
